Board Meeting Session Guide – Results in GPE 2030

Session Goal

The December 2025 Board meeting includes a thematic session on evidence and results for GPE 2030. The overall goal of the session is to provide a brief overview of the work accomplished on monitoring and measuring results under GPE 2030 and to invite Board reflection on the additional evaluation-based evidence that could be collected as part of the evaluation portfolio going forward.

The specific session objectives are to:

- Engage the Board in gaining a broad perspective on heretofore-agreed GPE 2030 data and evidence infrastructure, including the 2030 results framework, monitoring data, the value for money indicators, and the technology platform to underpin the data system;
- Provide examples of the results GPE expects to achieve during GPE 2030; and
- Invite Board reflection on the topics the evaluation and review portfolio could include to provide a deeper understanding and assessment of GPE's value and results.

Key Content Points

The session will cover the following three areas:

- Broad overview of the results measurement approach approved under GPE 2030:
    - GPE's theory of change that highlights the key areas of GPE's work - financing, partnership, and reforms - which collectively reinforce system strengthening to drive access, learning outcomes, and gender equality for children in partner countries
    - GPE 2030 results framework that responds to the recommendations of evaluations of GPE and that is aligned with GPE's objectives and theory of change
    - GPE's additional grant monitoring and operational data which will provide information of key interest to the partnership, including gender, climate, and inclusion. This data will also focus on detailed and more nuanced information on the substance, efficiency, effectiveness, and value for money of GPE's operations and partnership
    - Partnership responsibilities for collecting, reporting, assessing, and using data and evidence, supported by an online platform system
- Results expected under GPE 2030:
    - Illustration of the types of results the results framework indicators and monitoring data will capture regarding progress on the three GPE 2030 objectives

Official Use Only

- Evaluation and review portfolio under GPE 2030:
    - A robust portfolio of evaluations and reviews is envisaged to round out GPE's evidence infrastructure to assess and demonstrate GPE value and the results it generates. The evidence from this portfolio is expected to inform strategic and operational improvements, engage the partnership in evidence-informed decisions, and support Board oversight
    - Initial examples of evaluation questions that could be addressed
    - The Secretariat will submit a Secretariat work program for this portfolio for PILC review in April 2026 and Board decision in June 2026

Run-of-show

Time	Topic	Speaker
15 mins	**Opening and presentation from the Secretariat** Short presentation on GPE approach to results measurement and discussion on potential evaluations	**Chair:** Judith Herbertson, PILC Chair **Speaker:** Nidhi Khattri, Manager, Data, Analytics, and Evaluation Hub
40 mins	**Board discussion** Board comments and questions. Suggestions on evaluations and reviews to consider for supporting evidence-informed decisions and partnership learning during GPE2030	**Chair:** Judith Herbertson
5 mins	**Closing:** Chair summarizes and closes
