

Advocacy & Social Accountability Mechanism

The Advocacy and Social Accountability (ASA) funding mechanism was approved for establishment by the Global Partnership for Education (GPE). GPE's aim is to strengthen national education systems to deliver stronger outcomes in the areas of learning and early childhood development, equity, gender equality, and inclusion. GPE is the largest fund for education in the world. The goal of the ASA mechanism is to enhance civil society capacity to further GPE's strategic objectives in learning, equity, and stronger systems by improving their participation, advocacy, and efforts to ensure transparency and increased effectiveness in national educational policy and implementation processes. As such it aims to support both the traditional education networks and civil society partners working in areas such as tax justice, citizens engagement in fiscal transparency and community mobilisation.
