The Education for All Fast Track Initiative (EFA FTI) was launched in 2002 as a global partnership between donor and partner countries to ensure accelerated progress toward the Millennium Development Goal of universal primary education by 2015. All low-income countries that demonstrate commitment to achieving universal primary education can receive support from EFA FTI.

This volume is a product of the staff of the FTI Secretariat. The findings, interpretations, and conclusions expressed in this volume do not necessarily reflect the views of the EFA FTI partners or the governments or organizations they represent. The FTI Secretariat does not guarantee the accuracy of the data included in this work. The boundaries, colors, denominations, and other information shown on any map in this work do not imply any judgment on the part of the FTI Secretariat concerning the legal status of any territory or the endorsement or acceptance of such boundaries.

Box 7: Road Map for EFA FTI Replenishment 26
As a long-time proponent of the right to education for all children, it gives me great pleasure to join the EFA FTI as Chair of the FTI Board of Directors. I am thrilled to be part of this extraordinary partnership. Over the years of my professional career, in both the public and private sectors, I have seen the transformative power of education and consider it a vital component of global peace and stability. It remains clear that education—particularly for girls—is one of the best investments a country can make to increase economic growth, improve public health, reduce violence, and break the cycle of poverty.

As demonstrated in this annual report, EFA FTI has achieved important results. In 2007, 19 million more children enrolled in primary school than in 2000; 12 FTI partner countries have achieved gender parity in the completion of primary education and another 15 are expected to do so by 2015.

This said, there is no room for complacency; 72 million children are still not in school and learning levels remain low in many developing countries.

Although EFA FTI has much to be proud of, it is at a crucial turning point. On the road ahead, the organization must respond to the recommendations of the independent mid-term evaluation that will be finalized and launched early in 2010. As the evaluation draft report points out, EFA FTI’s achievements to date have fallen short of expectations. The overall model—building on country-owned education sector plans—remains relevant, but the organization could be, and should be, doing far more to support accelerated progress toward good quality schooling for all children. The report further states that EFA FTI is the best vehicle for achieving EFA goals, but only with significant reform. I welcome these recommendations and, together with the FTI Board of Directors, FTI Secretariat and other key partners, I am committed to pursuing the necessary transformation of EFA FTI, which will help us become the most effective, results-oriented, global multilateral instrument possible.

As we move into the New Year, I look forward to 2010 becoming the “Year of Education.” It will be important to link the goals of EFA FTI with the 1-Goal Campaign organized around the World Cup in South Africa as a major advocacy exercise to showcase the need for financing Education for All. As all eyes turn toward the kick-off of the World Cup games in June 2010, the 1-Goal Campaign will serve as a global platform highlighting the need to provide all children a quality education and a prosperous future.

EFA FTI has come a long way, and I would like to take this opportunity to thank the previous Co-Chairs, Denmark and Italy, for their hard work and leadership over the past year and their commitment to the EFA FTI Partnership. There is still much work to do to achieve a reinvigorated and better performing EFA FTI. I am confident we can continue together to make great strides forward in fulfilling our promise to provide quality education for the most vulnerable children of this world. We look forward to charting a course for clear progress with your continued support to make EFA FTI better than it has ever been.

Getting More Children into School

Making Progress on the Education MDGs

➤ 3 Million More Children Enrolled in Grade 1
Between 2000/2001 and 2007/2008, the number of new entrants in the first grade of primary school for all FTI partner countries increased by three million. Fifteen FTI partner countries made remarkable progress over this period. In Cameroon, Guinea, and Mali, enrollment rates increased by more than 70 percent. In Djibouti, Niger, Burkina Faso, Ethiopia and Sierra Leone, new enrollments in the first grade of primary school more than doubled.

➤ 19 Million More Children in School
As a result of increased access in the first grade of primary school, total primary enrollment in FTI partner countries grew by 19.3 million between 2000 and 2007 (figure 1). Since 2000/2001, 15 FTI partner countries have exceeded the FTI benchmark of 100 percent for the primary gross intake ratio. By 2007/2008, in nine of these countries, new enrollment in the first grade had stabilized, suggesting that more and more children are starting school at the right age.

➤ Decline in Number of Out-of-School Children
In the current 40 FTI partner countries, the total number of out-of-school children decreased from 17.8 million in 2006 to 16.1 million in 2007. FTI partner countries accounted for 61 percent of the reduction in the world’s out-of-school population—from 75 million to 72 million—during this period.

➤ More Children Complete Primary Education
The primary completion rate (PCR) measures the proportion of children who complete a full cycle of primary education. Countries are considered to have achieved universal primary education (UPE) when they reach a PCR of 95 percent. Primary school completion rates in FTI partner countries increased from 58 percent to 68 percent between 2000 and 2007. Of the 40 FTI partner countries, 17 have achieved or are on schedule1 to achieve the goal by 2015 (figure 2). However, seven of those 21 countries have significantly improved their PCR: Cameroon, Guinea, Ethiopia, Mali, Niger, Rwanda, and Senegal.

---

1 In this Annual Report FTI partner countries that will not achieve the PCR level of 95 percent by 2015 despite their efforts are considered “not on schedule” rather than “off-track.” “Off-track” was used in previous EFA FTI Annual Reports.
Improvements in Girls’ Education

Increased access to primary school was accompanied by an overall reduction in gender disparity in FTI partner countries (figure 4). Eleven countries have achieved gender parity in initial access. Only one country (down from eight in 2000/2001) remains far from the gender parity goal. In the remaining FTI partner countries, gender parity is becoming more and more within reach, as evidenced by the increase...
in the gender parity index over time (figure 4). In Yemen, for example, access to primary education increased by one-third between 2000 and 2008, with girls accounting for about 60 percent of the increase.

In 12 FTI partner countries, boys and girls now equally complete a full cycle of primary education, an increase from 5 countries in 2000/2001. The gender parity goal in PCR is within reach for 15 other countries; 10 others remained far from achieving it in 2007/2008, compared to 15 in 2000/2001.

➤ Improved Transition Rates from Primary to Secondary Education

Transition rates from primary to general secondary education have increased in many FTI partner countries (figure 5). The improvement has been particularly notable in Cameroon, Djibouti, and Senegal, where it exceeded 50 percent between 2000/2001 and 2006/2007. In Georgia, Kyrgyzstan, the Lao People’s Democratic Republic (Lao PDR), Moldova, Mongolia, and Tajikistan, where primary school completion rates remain stable, transition rates to secondary education have also stabilized. By contrast, in Cambodia and Ethiopia, despite significant improvements in primary school completion, transition from primary to secondary has not increased.

In Guinea, where the PCR increased from 32 percent in 2000 to 62 percent in 2007, the children transitioning from primary to lower secondary dropped from 56 percent to 31 percent during the same period, with girls the most affected.
The legacy of conflict and economic collapse are such that 80 percent of schools are still in need of major repair. Nearly half of the country’s schools are without safe drinking water, one third does not have functioning latrines or toilets, and about one third of students do not have proper space at a desk. While primary enrollment rates have recovered, it seems that at least one in every four girls and one in every six boys do not complete basic education. Nonetheless, things are improving and EFA FTI has contributed to this progress, providing US$18.4 million during 2006–2009. EFA FTI funds were used to build or repair 47 schools benefiting 25,000 students, and to supply new furniture and equipment for 50,000 students. The funds financed the publication of 1.6 million copies of 27 textbooks, helping to eliminate the shortage of Tajik language textbooks in major subjects. The funds also supported the training of 3,700 teachers and over 400 school directors. “Now we have nice warm classes,” explains Ruhshona Pulodi, a 14 year-old girl in grade 8, “Separate toilets for boys and girls have been constructed. I have textbooks on all subjects and can prepare my lessons on time.” In all these areas, EFA FTI support has been coupled with improved standards, and these in turn are helping to improve the effectiveness of all education spending.

BOX 1 | EFA FTI contribution in Tajikistan

Enabling FTI Partner Countries to Reach All Children

As noted above, education indicators continue to show strength, both in terms of initial access to schooling and in primary school completion, with girls doing particularly well. However, many countries are still not on a trend line to achieve a primary school completion rate of 95 percent by 2015. As stressed in the Global Monitoring Report for 2009, there is significant unfinished business to address the problems of out-of-school children, great inequality in many countries and the abysmal lack of services in countries in crisis and transition situations. In 2009, EFA FTI has taken a number of measures to improve impact and results including the addition of new partner countries, introducing learning indicators to the EFA FTI Indicative Framework and providing an Equity and Inclusion Toolkit to improve the probability that all children will learn.

EFA FTI Welcomes Four New Partner Countries

Four countries joined the EFA FTI Partnership in 2009: Bhutan, Lao PDR, Malawi, and Nepal. EFA FTI now supports 40 low-income countries in a coordinated effort to achieve their MDG goals on education and gender parity. Twenty-three of these countries are in Sub-Saharan Africa.

Benchmarks on Learning Outcomes

EFA FTI strongly encourages partner countries to measure student learning and the quality of teaching in order to make informed policy decisions. In 2009, the Partnership undertook extensive consensus-building consultations on learning and teaching matters with experts and stakeholders, and adopted two specific indicators of learning outcomes:

- The proportion of students who, after two years of schooling, demonstrate sufficient reading fluency and comprehension to “read to learn;”
- The proportion of students who are able to read with comprehension, according to their countries’ curricular goals, by the end of primary school.

Tracking reading progress requires sound, simple, and affordable assessment tools. The Early Grade Reading Assessment (EGRA) is a useful instrument developed by USAID (United States Agency for International Development) and used in over 30 countries, including 20 FTI partner countries. Timor-Leste is among the countries that carried out an EGRA assessment in 2009 using EFA FTI funds (box 3). The results, which showed overall modest performance, significantly informed discussions on how to improve learning outcomes. Institutions such as UNESCO, the World Bank, the Hewlett Foundation, USAID, UK Department for International Development, and civil society partners (Pratham in India, for example) are experimenting with promising approaches to achieve and track improved learning outcomes.

---

LAO PDR: Lao PDR is a landlocked country with around 80 percent of the population still dependent on rural livelihoods. Poverty is widespread and is weakening the country’s capacity to achieve universal primary education completion by 2015. The EFA FTI Partnership endorsed Lao PDR’s 2009–2015 Education Sector Development Framework (ESDF) in March. The primary school net enrollment rate has risen to 89 percent, but repetition and dropout rates are high resulting in only 67 percent of students completing the full 5 years of primary schooling. The ESDF focuses on three key issues: equitable access, improved quality of educational services, and improved sector governance and performance management. Membership in EFA FTI will assist the Ministry of Education and local development partners to achieve the objectives of the ESDF.

NEPAL: The EFA FTI Partnership endorsed Nepal’s School Sector Reform Plan (SSRP) in March. Nearly 8 percent of primary-school aged children do not go to school, and these numbers increase sharply for higher levels of schooling, with a 30 percent dropout rate in primary grades. Support from EFA FTI through the implementation of the SSRP will help bring the hardest to reach children into schools with access to a good quality education and reduce the financial burden on communities. With an annual per capita income of about US$470 in 2008, Nepal is among the poorest countries in South Asia.

MALAWI: The EFA FTI Partnership endorsed the 2008–2017 National Education Sector Plan (NESP) in October. Malawi remains one of the poorest countries in the world. Malawi’s education system suffers from a high drop-out rate, leaving only 35 percent of pupils entering the last grade of primary school. Other challenges affecting Malawi’s education sector are the pressures from a large youth population and a high prevalence of HIV/AIDS among teachers. The NESP goals are: (a) expanded equitable access to education, (b) improved quality and relevant education, and (c) improved governance and management.

BHUTAN: In December 2009, the EFA FTI Partnership endorsed the Royal Government of Bhutan’s 2002–2020 Education Sector Strategy. As a landlocked country with a predominantly rural population scattered across mountains, it has made remarkable strides toward achieving greater education development reaching 81% primary school net enrollment in 2008. Additional resources are needed to reach the remaining children that are out of school and to respond to the demand for secondary education as more students climb the school ladder. Local donors will help the country realize its Vision 2020 and funds will be directed toward improving teacher training, ensuring equitable access to education, improving textbook content and providing education to children with special needs.

“...It is simply not true that improving education quality takes 10 years. Community involvement, professional teacher training and the provision of textbooks will help children learn. These steps must go hand in hand with the introduction of learning assessments.”
—Luis Crouch, Senior Vice-President, Research Triangle Institute, Research Triangle Park, North Carolina, USA.

Leaving No Child Behind
Many groups of children are often overlooked when countries develop their education sector plans. These include children who are least likely to attend school, such as girls and children in rural communities; children affected by conflict, or from linguistic minorities; working children, and children infected with HIV/AIDS or children with special needs.

Reaching Out-of-School Children
In 2009, the FTI Secretariat commissioned a study, “Reaching Out to Out-of-School Children: Putting Inclusive Education on the Fast Track,” to explore how the EFA FTI Partnership could develop a targeted outreach program. The study identified approaches countries could use to target out-of-school populations. Namely, they should: (a) tailor the approach to specific marginalized groups, (b)
reduce obstacles for children to go to school, (c) use an inclusive lens, and (d) use multisectoral approaches. The FTI Secretariat consulted a number of experts—from UNICEF, the International Labour Organisation (ILO), UNESCO, Inclusion International, Save the Children, World Vision, the UK Department for International Development (DFID), German Technical Cooperation (GTZ), the Swedish International Development Cooperation Agency (SIDA), USAID, and the Brookings Institution—for their views on this approach. From their review, it was recommended that EFA FTI focus on country-level and subnational regions, expand collaborative efforts at the global level, and ensure that inclusive education be integrated into overall EFA FTI structures and processes.

**Piloting the Equity and Inclusion Tool in Three FTI Partner Countries**

The EFA FTI’s Equity and Inclusion Toolkit was developed by the UN Girls’ Education Initiative; the UNAIDS Inter-Agency Task team (IATT) on Education; the Global Task Force on Child Labor and Education; the EFA Flagship on the Right to Education for Persons with Disabilities (convened by UNESCO); the FTI Secretariat; and civil society partners, including World Vision. It was designed primarily for ministries of education as they prepare and revise their education sector plans; for local education groups as they provide support to governments in plan preparation; and for development partners as they review plans for FTI endorsement in conjunction with the EFA FTI Indicative Framework and Appraisal Guidelines. The toolkit was developed to facilitate the gathering and analysis of data on equity and inclusion and promotes a more comprehensive approach to providing equitable education for all children.

The toolkit was piloted in 2009 in Kyrgyzstan, Lesotho, and Malawi (box 4). Overall, it was found to be effective for members of the local education group in assessing key issues of marginalized groups. In many cases, the toolkit shed light on areas that had never been explored or discussed before. The final toolkit, expected to be available in 2010, aims to be an adjunct to other tools available in the EFA FTI context with a special focus on the most disadvantaged children in society and their right to education.
In Kyrgyzstan, the pilot exercise was conducted by representatives of the Ministry of Education, development partners and national stakeholders working in the fields of girls’ education, children with disabilities and other vulnerable children. The exercise helped raise the profile of the issues involved and facilitated cooperation between different agencies in the education sector as well as across sectors. The tool helped shape education policy and strategy and inform planning processes in addressing issues of equity and inclusion.

In Lesotho, the pilot exercise was conducted by representatives from the various departments of the Ministry of Education and Training and development partners like the World Food Program, Irish Aid, the World Bank, UNICEF and the Japanese International Cooperation Agency (JICA). The exercise clearly revealed that the government had not had a mechanism for undertaking such a crosscutting analysis before. Many participants asked why they did not have access to the tool earlier. The tool enabled dialogue on issues such as gender-based violence and sexual abuse at school and the adequacy of the HIV prevention education curriculum.

Malawi participated in the pilot exercise during the national process of preparing its National Education Sector Plan (NESP) for appraisal at the country level. The exercise took place in the context of a two-day workshop and was provided with consultancy assistance to pilot the equity and inclusion tool. The tool was well received by the Ministry of Education. Civil society organizations took part in the exercise and gave positive feedback on the use of the tool. Since Malawi had already finalized its NESP, the tool could not be integrated into the planning cycle early on and benefits were limited.
Evidence for Improvements in Aid Effectiveness

The year 2009 provided evidence of EFA FTI’s increased focus on ensuring aid harmonization and effectiveness at the country level: The US$102 million allocation to Burkina Faso was approved by the Catalytic Fund Committee as the Catalytic Fund’s first grant to be disbursed as government general budget support. The general budget support modality ensures full use of government systems and alignment with the government’s medium-term expenditure framework and its Poverty Reduction Strategy Paper. Key features of the Burkina Faso allocation are:

- Unearmarked budget support disbursed directly into the government’s budget;
- Annual disbursements linked to the achievement of results and using performance assessments based on an agreed-upon three-year matrix of policy measures;
- Monitoring budget allocations to basic education in line with the country’s mid-term evaluation framework 2009–2011.

In December 2008, the Catalytic Fund Committee approved for the first time a country allocation to be supervised by an organization other than the World Bank: The Netherlands was selected as the supervising entity of the Catalytic Fund allocation to Zambia. The Catalytic Funds’ first transfer agreement between the Netherlands and the World Bank as Financial Administrator became effective in August 2009 after development and sign-off by the Catalytic Fund Committee on the terms of arrangement. This transfer agreement now serves as a model for future arrangements with supervising entities other than the World Bank, including an allocation to UNICEF in support of Madagascar’s program, which became effective in December 2009.

In the five countries approved for Catalytic Fund support in 2009—Rwanda, Haiti, Lesotho, Tajikistan, and Nepal—three Catalytic Fund allocations will be implemented through modalities that are better aligned with government systems than are project-type approaches. This practice differs from the previous three years, when 19 of 27 new Catalytic Fund allocations chose project-type funding as the preferred modality.

In Rwanda, a Catalytic Fund grant of US$35 million is implemented through sector budget support. In Lesotho, a US$20 million Catalytic Fund grant will contribute toward a larger pooled fund with Irish Aid. A US$120 million Catalytic Fund grant for Nepal is pooled with resources from nine other development partners and the government, bringing funds for the sector up to nearly US$2.5 billion over a period of six years. Although the Catalytic Fund grant to Tajikistan will be delivered through a standalone project, the government of Tajikistan, UNICEF, and the World Bank have collaborated closely on a project design that focuses on strengthening government capacity to provide a better-aligned modality for future contributions. In both Lesotho and Tajikistan, existing project implementation units were dismantled in favor of implementation through government systems.

The EFA FTI draft mid-term evaluation confirms that “... by advocating for ownership, for using existing structures and processes, and for harmonization and alignment, the FTI has sought to ensure the application of the Paris Declaration principles to the education sector, both globally and at country level.” It goes on,
however, to challenge the EFA FTI Partnership to do more to galvanize changes to the “business as usual” aid model at a country level, and in particular to:

- Ensure Catalytic Fund allocations are delivered through the best-aligned modality available at country level. This implies that the donors will agree to use national public financial management and procurement systems to the extent possible, and agree to strengthen their quality and capacity as per the September 2008 Accra agreements.

- Adopt greater flexibility regarding the selection of supervising entities.

- Ensure that the “mutual accountability” principles on which EFA FTI is built are rigorously applied and effectively monitored.

**Improved Country Support for Local Education Groups**

EFA FTI’s success in helping low-income countries accelerate progress toward the EFA and MDG education and gender goals requires continued improvements in support for country-level processes—and stronger communications with the coordinating agencies and local education groups. Therefore, in 2009, the FTI Secretariat improved its system to facilitate country-level collaboration, giving responsibility for partner countries communications and support to focal persons within the Secretariat. These focal persons will act as the first line of contact for all EFA FTI communications; provide support to ESP development and Education Program Development Fund (EPDF) and Catalytic Fund applications; and provide guidance on compliance with EFA FTI requirements. Also in 2009, FTI focal persons: (a) met with local education groups in Nigeria, Vietnam, and the Democratic Republic of Congo to support early FTI planning; (b) organized multiple videoconferences with new and existing FTI partner countries to discuss and resolve emerging issues; and (c) provided intense support to countries preparing a Catalytic Fund application. In addition, the FTI Secretariat has strongly encouraged coordinating agencies and governments in FTI partner countries to improve the predictability of countries’ requests for EFA FTI endorsement and funding.
Responding to the Needs of Countries in Crisis or Transition Situations

In 2009, 74 percent of Catalytic Fund allocations went to three post-crisis countries: Tajikistan, Nepal, and Haiti. To date, 12 countries in crisis and transition situations have received 31 percent of the total Catalytic Fund allocations.

Countries in crisis or transition situations lack a regular funding mechanism that can provide major assistance for education. This is due in part to the high-risk environment and its weak institutional capacities and governance, low accountability, and instability, which significantly limit policy-making and service delivery capabilities. In response, EFA FTI is creating a funding window that will help low-income countries that lack the capacity to develop and implement an education sector plan to join the Partnership and receive financial support. The EFA FTI Board of Directors has approved an interim approach that modifies the Partnership’s country-level processes for countries with low institutional capacities. The FTI Secretariat is developing operational guidelines to help countries receive FTI endorsement and financial support.

Scaled-up efforts to assist countries and regions in crisis and transition situations, such as Liberia, the Democratic Republic of Congo, Afghanistan, Cambodia.

“With the attractive package for teachers introduced through the EFA FTI program, I’m certain that we will meet the target by 2015,” stated Biran Saine, a teacher at the lower basic school in Chamoi-Bunda, The Gambia. “UNICEF was able to assist the government in mobilizing US$28 million from the FTI Catalytic Fund to help teachers and promote quality education. [...] The program is instrumental in the retention of students, especially girls,” Biran explained further. “It ensures that each child is provided with a personal textbook, free of charge, and other relevant learning resource materials, which has contributed to the increase in enrollment.”

— UNICEF, The Gambia
Burundi, Chad, Cote d’Ivoire, Guinea-Bissau, and South Sudan are priorities for the EFA FTI’s agenda in 2010. Indeed, half of the countries expected to apply for EFA FTI endorsement in 2010 are in crisis or transition. The Democratic Republic of Congo, for example, would greatly benefit from a transitional funding mechanism. In that war-torn country, some seven million children are out of school; there is a severe lack of trained teachers; parents who can little afford it have to pay school fees; and providing even basic education services in remote, inaccessible areas in the country is a tremendous challenge.

**Prioritization**

The Partnership developed a mechanism to help prioritize beneficiary countries for EFA FTI funding which will be rolled out in 2010. This process aims to ensure transparency and more predictable medium-term financing from EFA FTI. Decisions on the amount to be allocated to a given country will be made based on the following four factors:

1. **Eligibility:** All countries with an endorsed interim or full education sector plan in the two lowest categories of IDA\(^3\) are eligible for financing from the Catalytic Fund. Small island countries in all three IDA categories are also eligible.

2. **Commitment:** A firm commitment from the local education group to finalize the funding application within a timeframe communicated to the FTI Secretariat.

3. **Needs and performance:** The amount of the allocation will be determined by a Needs and Performance Indicator and total available EFA FTI resources. The needs of a country are measured by the distance from the education MDGs, the number of school-age children, per capita income, and the amount of planned external aid. Education performance is derived from the World Bank’s Country Policy and Institutional Assessment (CPIA), and on progress in meeting MDG 2.

4. **Predictability of demand and availability of EFA FTI resources:** Total donor commitments will be divided among countries applying for EFA FTI fund support so that countries have an indicative planning figure in preparing their funding request. This calculated amount can be adjusted to provide incentives for countries making good progress.

\(^3\) The International Development Agency (IDA) ranks eligible low-income countries in three categories based on their income per capita. Category I covers the poorest countries; category II covers countries in a middle range; and category III covers countries in the highest range. IDA revises its categories every year based on recent economic developments.
Leveraging Domestic Financing for Education

EFA FTI was established in 2002 as a “global compact” between low-income countries and donor partners. Donors commit to help mobilize resources and make them more predictable; beneficiaries demonstrate their commitment to UPE through adequate and sustainable domestic financing. It is suggested that partner governments commit 20 percent of their national budgets to education—of which 50 percent should go to primary education.

On average, over the period 2000 to 2008, current FTI partner countries: (a) increased the share of domestic product to education by about 0.5 percent to 4.5 percent; (b) increased the share of education expenditures in the national budget by close to one percent, to approach the FTI benchmark of 20 percent; and (c) maintained the share of resources devoted to the primary/basic subsector at about 47 percent.

Close to 60 percent of partner countries are located in Sub-Saharan Africa. Africa is also the region where, on average, resource flow into the education sector increased the most during the period of analysis. In 2008, for instance, education expenditures claimed 4 percent of GDP in Africa and 20 percent of government budget, with 51.1 percent of those resources going to the primary/basic education subsector.

Bilateral Aid to Education in Low-Income Countries

After stagnating at US$2.7 billion in the two years that followed the 2000 World Education Forum in Dakar, bilateral aid to education in low-income countries increased to US$4 billion in 2004. However, this significant increase was scaled-back to US$3.3 billion in 2005. In 2006, aid increased by US$1.2 billion, with France, the Netherlands, and the United Kingdom contributing 98 percent of the increase (figure 9). Total 2007 bilateral aid commitments to education amounted to US$3.4 billion, a 22 percent decline from 2006. Again, however, France, the Netherlands, and the United Kingdom were responsible for US$1.3 billion of total commitments, nearly 40 percent.

Bilateral aid to basic education followed the same pattern as total aid commitment to education (figure 8).

In 2007, low-income countries received 62 percent of the total aid donors committed to basic education (US$2.6 billion). Despite the priority given to low-income countries, the level of aid committed to basic education in these countries remains low compared to the external financing needs, estimated at US$11 billion per year, to achieve the goals for all low-income countries for UPE, early childhood care and education, and literacy (UNESCO, 2007 and 2008).

The level of financing to basic education mobilized by donors varies across FTI partner countries. Overall, for the group of 19 countries endorsed between Constant 2007 US$ billion

The main sources of data are UNESCO’s Institute of Statistics, the IMF’s Article IV Consultations documents, and country-level data found in various World Bank databases and Country Information Forms. Caution should be exercised in the use and interpretation of these preliminary data, because of missing data and reference to different level of education (primary or basic education).

Source: FTI Secretariat using OECD/DAC CRS online database.
In the same period, commitments increased in six countries—Burkina Faso, Ghana, Ethiopia, Kenya, Mozambique, and Timor-Leste—and remained at about the same level in Vietnam and Tajikistan. Four FTI partner countries experienced a significant reduction in aid commitments to basic education: Gambia (52 percent), Guinea (75 percent), Nicaragua (26 percent), and Yemen (21 percent).

In terms of disbursements, total aid to basic education in the same 19 FTI partner countries increased from US$314 million in 2002 to US$1 billion in 2007.

EFA FTI Trust Funds

Catalytic Fund Status

Donors have pledged US$1.6 billion to the Catalytic Fund, of which US$201 million represents financial pledges for the period 2010–2013. Disbursements for 2009 are US$220 million. Overall disbursements since the fund’s inception amount to US$687 million.

Recent Performance in Processing of Catalytic Fund Grants

Since 2007, changes in procedures related to the Catalytic Fund process include:

- Preparation of documents and safeguard reviews prior to grant allocations;
- Adoption of more flexible grant modalities, when warranted;
- Closer collaboration among stakeholders of the Catalytic Fund portfolio.

These changes are producing positive results: the lag between allocation and grant signature dropped from 12.8 months for allocations made in 2007 to 5.6 months for those made in 2008.

The lag for Catalytic Fund disbursements has decreased considerably over the past two years. For allocations made before May 2007, only 12 percent were not disbursed by November 2009. The disbursement lag for allocations made after May 2007 is 3.5 percent (excluding two countries under suspension—Guinea and Madagascar).

More FTI Partner Countries Receive Financial Support

Catalytic Fund allocations reached US$1.6 billion for 32 countries in 2009. Rwanda, Nepal, Lesotho, Tajikistan, and Haiti received Catalytic Fund allocations totaling US$210.5 million during the 2009 calendar year (figure 11). Nepal and Haiti received three-year grants from the Catalytic Fund for the first time. In Nepal, Catalytic Fund support enables strategic activities and investments to accelerate progress in education. For Haiti, Catalytic Fund support will be structured to respond flexibly

---

22 Education for All Fast Track Initiative • 2009 Annual Report
to the effects on the education sector of the recent devastating earthquake. In Tajikistan, the Catalytic Fund grant will help: (a) build and rehabilitate schools and provide basic school materials to over 60,000 students, (b) provide supplementary reading materials to roughly one-quarter of the country’s schools, and (c) provide extra training to 20,000 teachers every year. In Lesotho, the Catalytic Fund will provide an additional 1,000 gender- and disabled-friendly classrooms for existing primary and pre-primary schools, rehabilitate at least a further 400 classrooms, and provide furniture for at least 1,400 classrooms. It will also support operating costs for 150 additional classrooms for 6,000 children, providing schooling to 10 percent of the age-five population, and improve the quality of teaching and learning. In Haiti, coordination among agencies on the ground is ongoing to restructure the Catalytic Fund proposal with the objective of maximizing responsiveness and leveraging other resources and efforts in the education sector. Immediate support is proposed for school feeding and the provision of temporary school facilities.

Country Programs Requesting Funding by the End of 2010

Some 20 countries7 are projected to seek Catalytic Fund financing by the end of 2010. These include three categories of countries: (a) countries eligible for Catalytic Fund support and coming forward for EFA FTI endorsement in 2010, (b) countries that are currently Catalytic Fund beneficiaries returning for additional support, and (c) two countries with FTI-endorsed education sector plans that are not yet Catalytic Fund beneficiaries—Lao PDR and Liberia.

Providing Support for Education during Political Transition

In 2009, in Madagascar, Mauritania, and Guinea, the implementation of Catalytic Fund activities faced particular constraints due to political upheavals. The Catalytic Fund Committee sought solutions to prevent a reversal in education progress and to prevent

---

7 This includes possible applications from provinces or federal states.
the children in these countries from suffering further from the crises.

For example, rather than suspend or cancel the US$85.1 million allocation made to Madagascar in 2008, following political turmoil in the country, the Catalytic Fund Committee agreed in 2009 to allocate US$15 million of it to UNICEF to support teachers’ salaries and school construction for communities without schools over the period January–June 2010. The Catalytic Fund Committee further agreed to consider proposals made by the Madagascar Local Education Group for program activities from July 2010 for an amount up to US$49 million. The balance of the original allocation was made available for allocation to other country programs.

In Mauritania, following elections in July 2009, the Catalytic Fund allocation of US$14 million approved in May 2007 is again being implemented. In Guinea, the Catalytic Fund grant of US$117.8 million was suspended in December 2008, following the death of President Conte and the seizure of power by the military. The ongoing crisis has had a notable impact on children: more than 100,000 primary school children may be deprived of an education and 1,200 schools are facing operational cost shortfalls. The local education group will submit a proposal for restructuring the program in spring 2010.

**Education Program Development Fund**

The Education Program Development Fund (EPDF) was created in November 2004 to enable more low-income countries to develop education sector plans, a key requirement for accessing EFA FTI support. As of the end of December 2009, donor commitments to the EPDF reached US$114 million (annex 2), of which US$112.1 million has been allocated. To date, US$94.5 million of that amount has been allocated to support country-specific and regional activities involving 60 partner countries worldwide; US$17.6 million has been allocated to the Global Campaign for Education to support its Civil Society Education Fund project. Its purpose is to build the capacity of national civil society coalitions in FTI partner countries in Asia, Africa, and Latin America so they can be more fully engaged with national governments and local donor groups in working toward EFA goals.
Since December 2008, a task team has been working on restructuring the Education Program Development Fund. In November 2009, the FTI Board of Directors approved the task team's proposal to develop the Policy and Capacity for Education (PACE) program, the successor program to the EPDF, beginning in July 2010. PACE is intended to contribute significantly to strengthening both local education groups and the capacity of governments to implement their education sector plans. Program participants recognize that capacity building goes beyond support to include the preparation of education sector plans; strengthening policy implementation and financing; and monitoring results achieved.

PACE's objectives are to:

- Strengthen the capacity of low-income countries, including countries in crisis and transition situations, to shape and achieve their education goals;
- Improve the capacity at the country level to prepare and endorse education sector plans or interim plans; and
- Facilitate better coordinated support, knowledge development and sharing, and stakeholder engagement.

New Trust Fund Architecture: the EFA Fund

At the November 2009 meeting in Rome, at the request of the FTI Board of Directors, the FTI Secretariat presented a proposal for a single EFA Fund to replace the existing multiple EFA FTI trust fund arrangements. Currently, each EFA FTI trust fund operates with its own rules, procedures, and decision-making structure. The resulting “fund fragmentation” is seen as weakening the linkages between the FTI Board of Directors’ decision making and country-allocation decisions, blunting the impact of recent governance reforms intended to give voice to FTI partner countries, and increasing the cost of doing EFA FTI business. More than simply addressing the complexity of funds administration, the single EFA Fund approach would aim to reestablish the centrality of the partner country in the EFA FTI process; create a unified dialogue with the EFA FTI Partnership, connecting EFA FTI policy with funding; and provide a focus for the political leadership needed to support a successful replenishment of EFA FTI.
**Resource Mobilization and Replenishment**

The EFA FTI Partnership has repeatedly stressed the importance of more sustainable and predictable financing for basic education in low-income countries. In their 2009 summit communiqué, G8 leaders singled out the replenishment of EFA FTI as a priority investment for sustainable development and economic growth. The task team on EFA FTI replenishment emphasized the need to establish more long-term and additional financing for endorsed FTI partner countries. In its report, the task team defined two phases of a resource mobilization effort:

- The first phase is intended to meet the financing needs for the EFA FTI trust funds, covering the 18-month period from June 2009 to December 2010;
- The second phase is intended to meet the financing needs of FTI-endorsed and candidate countries beyond 2011.

The resource mobilization effort for EFA FTI was announced at the EFA FTI Steering Committee meeting in Copenhagen in April 2009. This was followed by a formal launch at a ministerial breakfast meeting, hosted by Danish Minister of Development, Ms. Ulla Tørnæs, and World Bank Managing Director, Mr. Graeme Wheeler, in Washington, DC on April 25, 2009.

---

**BOX 7 | Road map for EFA FTI replenishment**

**Filling the immediate US$1.2 billion financing shortfall for the EFA FTI trust funds**

**PHASE I: June 2009–December 2010**

- Carol Bellamy visits various capitals to meet with high-level donor representatives
- Mapping of a strategic action plan for the resource mobilization effort
- Production of communications material in support of the resource mobilization effort
- Outreach to civil society organizations and foundations in Europe and North America
- 14 leading African Ministers address financing needs for EFA in letter to counterparts in OECD donor countries
- High-Level Roundtable on Financing EFA at the World Bank Annual Meetings in Istanbul in October 2009
- Existing donors to the EFA FTI trust funds requested to fill the short-term financing gap in November 2009
- Donor pledges by existing EFA FTI donors amounted to US$1.66 billion by the end of 2009

**Covering financing needs until 2015**

**PHASE II: 2011–2015**

- Determining overall financing needs with EFA FTI Needs and Performance Framework
- Financing gap would reach a minimum of US$2 billion per year or US$6 billion for 3-year financing cycles from 2011 onwards¹
- Road show and intermediate events will accompany strategic and political resource mobilization effort
- A conference organized around the World Cup in South Africa in June 2010 will benefit from the momentum and public awareness built up by the 1-Goal Campaign
- EFA FTI replenishment can gain from the agenda of the G8-G20 under the leadership of Canada, which is an FTI Board member

¹The EFA FTI Secretariat estimated in 2008 that the financing gap would reach a minimum of US$2 billion per year or US$6 billion for a 3-year period based on the needs of low-income countries.
Building on Progress in 2009

New Board of Directors

Based on the reformed governance structure of the EFA FTI Partnership, an expanded, more inclusive 17-member Board of Directors came into effect on July 1, 2009. Members represent the various EFA FTI constituencies (annex 4)—including the private sector, new donors, partner countries, and civil society organizations. The Board of Directors serves as the governing body of EFA FTI and is responsible for setting policies and strategies, as well as reviewing and approving objectives for the EFA FTI Partnership.

The Board of Directors represents the EFA FTI Partnership and provides overall policy guidance and coordination. Plans call for the redesign in 2010 of the EFA FTI funding instruments; this would give the Board authority to make funding decisions now made by the trust fund committees. Among other benefits, this will provide a clearer focus for decision making and ensure partner country and civil society participation in these financial decisions.

Independent Chair Appointed

At the November 4, 2009 meeting of the Board of Directors, following a competitive process and consistent with EFA FTI’s reformed governance structure, Ms. Carol Bellamy was unanimously selected to be the first independent chair of the FTI Board of Directors. Ms. Bellamy is a well-known international advocate for children’s education and children’s rights. She served as UNICEF Executive Director from 1995 to 2005 and Director of the U.S. Peace Corps from 1993 to 1995. More recently, she was President and CEO of World Learning, a U.S.-based international organization that promotes international learning and development in over 75 countries. Her appointment is for three years beginning in December 2009.

“One of the high-priority areas for the FTI Board of Directors in 2010 is to lead efforts to build on and expand successes of the EFA FTI to ensure millions of children can go to school.”

—Carol Bellamy, Chair of the EFA FTI Board of Directors.

Head of the FTI Secretariat Appointed

The selection of Mr. Robert Prouty as the head of the FTI Secretariat was announced by the new chair in mid-December 2009. The search for the head of the FTI Secretariat was led by a committee of the Board chaired by Italy co-chair, Mr. Renzo Rosso, and consisting of representation from Denmark, Burkina Faso, the UK, UNESCO, and the Global Campaign for Education. Over 70 candidates were considered for this position. Mr. Prouty is well known to the FTI community having served as acting head of the Secretariat since November 2008. He holds a Ph.D. in Educational Administration with an emphasis on African studies and specializes in classroom issues and learning outcomes. He has extensive development experience in education.

Learning from the Mid-Term Evaluation

The EFA FTI Board of Directors received the draft mid-term evaluation in November 2009. This important report allows the EFA FTI Partnership to take stock of its initial years and to consider new directions and the relevance of its operational and institutional goals. The evaluation identifies opportunities for the advancement of the EFA FTI agenda at a global level. It affirms the importance of the EFA FTI Partnership for the development of education in low-income countries. It concludes that the EFA FTI’s goals remain important and relevant but that the Partnership has not had the impact to date that it could and should have had. It suggests three critical
areas where the Partnership can significantly ramp up its efforts:

1. **Catalyzing an increase in aid for education at the country level.** There has been little growth in aid commitments to education in recent years and EFA FTI must take greater responsibility as a global advocate for increasing all education funding.

2. **Driving progress on the Paris Declaration agenda.** There is considerable scope for EFA FTI to better communicate its aims for improving and influencing progress toward aid effectiveness at the country level and, importantly, to ensure that EFA FTI-funded activities are better linked to this objective.

3. **Strengthening policy and planning for better education outcomes at the country level.** Evidence from the country case studies strongly suggests that EFA FTI must provide more effective support to countries as they develop and implement education sector plans and, through this, to promote accelerated progress toward EFA.

Embracing the challenges identified by the evaluation and building on the partnership’s existing strengths presents an exciting opportunity for reform in 2010 and beyond. The EFA FTI Partnership has already started to use the evaluation to develop a comprehensive roadmap to reform. It will realign the Partnership to meet the new and emerging challenges outlined in the evaluation and subsequent directions from the FTI Board of Directors.

EFA FTI task teams are created to complete a specific task needed to fulfill the EFA FTI Partnership’s work program. The FTI Board of Directors commissions task teams as appropriate and provides oversight to ensure delivery of agreed terms of reference and timeframe. FTI task teams report to the FTI Board of Directors until their mandates are completed. FTI task teams are open to all partners on a voluntary basis, unless the purpose of the task team concerns specific constituencies.

➤ **Replenishment Mechanism Task Team**

United Kingdom, Chair

**MEMBERS**

United Kingdom, Denmark, World Bank, Spain, UNESCO, European Commission, FTI Secretariat

**DESCRIPTION**

The task team was commissioned in Oslo in December 2008 to recommend a detailed replenishment mechanism to the FTI Board of Directors. The task team presented several recommendations which were approved by the Steering Committee in Copenhagen in April 2009. Having completed its mandate and submitted its final summary report, the task team was disbanded.

➤ **Governance Task Team**

Denmark, Chair

**MEMBERS**

Canada, European Commission, Ghana, Global Campaign for Education, World Bank, UNICEF, FTI Secretariat

**DESCRIPTION**

The task team’s mandate was to finalize the Governance Document, following consultations across the various constituencies. Having completed its mandate by finalizing the governance document in March 2009, the task team was disbanded.

➤ **Prioritization Task Team**

Sweden, Chair

**MEMBERS**

Canada, European Commission, Germany, the Netherlands, Norway, Spain, UNESCO, UNICEF, World Bank, FTI Secretariat

**DESCRIPTION**

The task team was created in December 2008 to develop a proposal for a mechanism to assist in determining the prioritization of beneficiary countries. The task team held a final meeting on June 2009 in Stockholm, where it produced its final proposal.

➤ **EPDF II Task Team**

Australia, Chair

**MEMBERS**

Canada, Ireland, France, Norway, World Bank, UNICEF, FTI Secretariat

**DESCRIPTION**

The task team was commissioned in December 2008 to lead the redesign of the EPDF. The EPDF II Task Team met in July 2009 to develop a design draft for the new EPDF. It presented its design draft and recommendations at the Board of Directors and EPDF Committee meetings in November 2009 in Rome.

➤ **Transition Fund Task Team**

The Netherlands, Chair

**MEMBERS**

The Netherlands, United Kingdom, Global Campaign for Education represented by the Brookings Institution, European Commission, Canada, FTI Secretariat

**DESCRIPTION**

The task team was created in Paris in September 2009. The objective of the task team is to explore alternative options for financing countries with low institutional capacities and countries that do not meet the current Catalytic Fund criteria. Until alternate options have been explored and a new decision taken, the Catalytic Fund Committee will be asked to accommodate new requests from post-crisis and transition countries.
Representatives from Partner Countries

BURKINA FASO
Ministry for Basic Education and Literacy
Ms. Marie Odile Bonkoungou
Minister of Basic Education and Literacy
Ms. Ibrahima Kaboré
Permanent Secretary of the Ten Year Plan for Basic Education

*All values given in constant 2007 US$ millions unless single dollars specified. Disbursement data for Finland in 2004 and 2005 and for Luxembourg in 2002 and 2003 are not available. Basic education ODA includes 50% of Education ODA amounts not allocated by level and 10% of amounts allocated to general budget support. Secondary and Post-secondary education ODA each includes 25% of the amounts not allocated by level and 5% of amounts allocated to general budget support. Total Education ODA figures include the amounts for the three levels above and a notional 20% of general budget support received by the country (therefore amounts by levels don’t add up to total education amounts).*

---

Notes:
- All values given in constant 2007 US$ millions unless single dollars specified.
- Disbursement data for Finland in 2004 and 2005 and for Luxembourg in 2002 and 2003 are not available.
- Basic education ODA includes 50% of Education ODA amounts not allocated by level and 10% of amounts allocated to general budget support. Secondary and Post-secondary education ODA each includes 25% of the amounts not allocated by level and 5% of amounts allocated to general budget support. Total Education ODA figures include the amounts for the three levels above and a notional 20% of general budget support received by the country (therefore amounts by levels don’t add up to total education amounts).

† All values given in constant 2007 US$ millions unless single dollar specified. Disbursement data for Finland in 2004 and 2005 and for Luxembourg in 2002 and 2003 are not available. Basic education ODA includes 50% of Education ODA amounts not allocated by level and 10% of amounts allocated to general budget support. Secondary and Post-secondary education ODA each includes 25% of the amounts not allocated by level and 5% of amounts allocated to general budget support. Total Education ODA figures include the amounts for the three levels above and a notional 20% of general budget support received by the country (therefore amounts by levels don't add up to total education amounts).

† All values given in constant 2007 US$ millions unless single dollars specified. Disbursement data for Finland in 2004 and 2005 and for Luxembourg in 2002 and 2003 are not available. Basic education ODA includes 50% of Education ODA amounts not allocated by level and 10% of amounts allocated to general budget support. Secondary and Post-secondary education ODA each includes 25% of the amounts not allocated by level and 5% of amounts allocated to general budget support. Total Education ODA figures include the amounts for the three levels above and a notional 20% of general budget support received by the country (therefore amounts by levels don’t add up to total education amounts).
