Causes of slow disbursement

- Implementation capacity
- Governance challenges
- Political or natural crises
How to do better

1. Better identifying and managing risks to effective implementation
   • A focus on strong plans and government capacity to deliver
   • Getting the program design right
   • Monitoring sector performance
   • Managing grant performance closely

2. Clearer expectations and tougher decisions on underperforming grants
   • New protocol around time frames for grant signing and full disbursement
   • Getting implementation conditions right *before* applying for EFA FTI financing

3. Changing the way we give funding
   • Increased use of more aligned modalities
   • More predictable financing
   • More ‘absorbable’ funds
   • Performance-based financing
   • Direct implementation
   • Greater flexibility
